24 V DC / 1 A / 800 N / 600 mm stroke

Performance features:

Electromotive drive unit for opening and closing of windows, flaps and skylights. The drive is equipped with motor electronics controlled via microprocessor. Programmable drive functions (stroke limitation, force, speed) and performance features on site via Powerline (PLP) and the D+H software SCS. Can be used for openings for smoke exhaust; D+H Euro SHEV in accordance with EN 12101-2; and for daily ventilation. Particularly quiet drive in ventilation mode due to reduced running speed. Electronic limit stop and overload cut-off protect the element and the drive from damage. The power supply can be connected either from below or above. The drive unit can also be changed from left to right.
