

CDM-1000-0600-1-ACB M2

Performance features

- + Can be used for openings for smoke ventilation; D+H Euro SHEV in accordance with EN 12101-2; and for daily natural ventilation
- + With BSY+ motor and synchronised electronics controlled via microprocessor
- + Option of up to 4 drives in one synchronous group
- + High-speed function (HS) for especially fast opening windows in case of fire (SHEV)
- + Low running noises thanks to the innovative acoustic decoupling of the drive components
- + Special chain stabilisation and centred chain outlet
- + Compact design thanks to triple deflection of the chain
- + Use of a highly efficient, wear-free brushless motor
- + Relief of pressure on window gasket after closing process
- + Programmable drive functions and different drive parameters
- + Time-controlled reversing when an obstacle is detected in the CLOSED direction (active closing edge protection)
- + Integrated ACB (Advanced Communication Bus) bus interface with Modbus RTU protocol
- + The drive is integrated directly via open bus communication through the ACB (Advanced Communication Bus), e.g. in a building management system
